FREEDOM 3

It has the proper turning radius, hand rail positioning, tank height and other specific measurements for enhanced usability and total compliance. It also has a patented, flat ground-level entry that requires no ramp or special set-up and allows effortless entry and exit.

The Freedom is constructed from rugged polyethylene with a double-walled front and hidden knuckle door hinge that supports the door without sagging. The roof has added thickness and a trap ridge that fits over the side walls to create an incredibly rigid unit. To aid in transporting, the roof has built-in channels to hold straps in position when transporting and multiple handles to aid in handling.

Accessories/Options

- ❶ Basic flush kit (hand pump)
- ❷ Hand operated handwash (capacity: 45 l)
- ❸ Large tank (capacity: 257 l)
- ❹ Kit to lift the Freedom with an empty tank

Additionally, we also offer further accessories such as: soap dispensers, towel dispensers, corner shelf, gender indicator, mirror, 4-roll toilet paper holder and solar light.
